(54) IMPEDANCE CIRCUIT NETWORK

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a small-size impedance circuit network which is easily assembled and has simple structure.

SOLUTION: The impedance circuit network is formed with (a) inductors L1, L2, L3 and L4 consisting of a strip line 22 and (b) metallic members 25 arranged in the neighborhood of the strip line 22 at a variable distance between the metallic member and the strip line 22 and variable capacitors C1, C2 and C3 are formed by the members 25 and the strip line 22.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]
